Evaporative cooling works on the principle of heat absorption by moisture evaporation. Simply put, heat is removed from the air as water evaporates. You feel this principle in action when you step out of a swimming pool or shower and feel cool as water evaporates from the surface of your skin. Your evaporative cooler works on the same principle. The fan pulls hot outside air through the wet cooling pads, where the air is cooled by evaporation and then discharged from the cooler.

Manual for MC61/MFC6000
SETUP INSTRUCTIONS

Instantly feel cooler while camping, cooking out, or tailgating with the portable Hessaire MC61M 3,100 Cubic Feet Per Minute (CFM) Evaporative Cooler. Mechanical Control Panel Easy to operate rotary controls make using this air cooler a snap. Motor Speed Dial: Turn on the cooler and select your fan speed between Low, Medium, and High with the fan switch. Pump: Switch the pump on to saturate the internal Xel50 Cooling Media. Air Swing Delivery System: Turn the swing switch to on or off for automatic oscillation. Manual + Continuous Fill Options Flexible water fill options are available to you when you have the swamp cooler indoors or outside near a garden hose. Manual Fill: Utilize the 14.6-gallon tank to provide up to 4 hours of self-contained cooling Continuous Fill: Use the included garden hose hook-up with float valve for continuous water fill Air Swing Delivery System + Powerful Airflow Cooling the air is only a part of the process: propelling the chilled air into your space is what brings you needed relief. Specially engineered features from Hessaire allows this mobile evaporative cooler to provide an airflow of 5,300 CFM to your area. Proprietary fan propeller design with winglets throws the blast of cool air further and yet is very quiet. Additionally, the air swing delivery system moves cool air left to right across the room to ensure that air is evenly distributed. Portable Cooling Weighing only 84-pounds, the Hessaire MC61M is perfect for tailgating, camping, cookouts, or even indoors in a home office or workshop up to 1,600 square feet. While similar coolers only feature cooling media on 1 side, this swamp cooler has three-sided rigid cooling media, dispersing more cool air throughout your space. Additional Features Fan-Only: Use swamp cooler on one of the three fan speeds without water just to propel air throughout a room Cup Holder: Top cup holder is a great resting place for drinks Unique palm grill What is in the box?
